The auditors of the Company are Ernst & Young Vietnam Limited.

REPORT OF MANAGEMENT

Management of Maybank Kim Eng Securities Limited ("the Company") is pleased to present this report and the financial safety ratio report (liquid capital ratio report) of the Company as at 30 June 2015.

MANAGEMENT'S RESPONSIBILITY FOR THE FINANCIAL SAFETY RATIO REPORT (LIQUID CAPITAL RATIO REPORT)

Management confirmed that it has complied with the requirements of Circular No. 226/2010/TT-BTC dated 31 December 2010 issued by the Ministry of Finance on financial safety ratios and remedies applicable to securities companies that fail to meet the stipulated financial safety ratios and Circular No. 165/2012/TT-BTC dated 9 October 2012 amending and supplementing a number of articles of Circular No. 226/2010/TT-BTC in preparing and presenting the financial safety ratio report (liquid capital ratio report) as at 30 June 2016.

STATEMENT BY MANAGEMENT

Management does hereby state that, in its opinion, the accompanying financial safety ratio report (liquid capital ratio report) is prepared and presented in accordance with Circular No. 226/2010/TT-BTC dated 31 December 2010 issued by the Ministry of Finance on financial safety ratios and remedies applicable to securities companies that fail to meet the stipulated financial safety ratios and Circular No. 165/2012/TT-BTC dated 9 October 2012 amending and supplementing a number of articles of Circular No. 226/2010/TT-BTC.

REPORT ON REVIEW OF FINANCIAL SAFETY RATIO REPORT

To: The owner of Maybank Kim Eng Securities Limited

We have reviewed the accompanying financial safety ratio report (liquid capital ratio report) as at 30 June 2016 of Maybank Kim Eng Securities Limited ("the Company"), as prepared on 12 August 2016 and set out on pages 4 to 28.

Management's responsibility

The Company's management is responsible for the preparation and fair presentation of this financial safety ratio report (liquid capital ratio report) as at 30 June 2016 in accordance with Circular No. 226/2010/TT-BTC dated 31 December 2010 issued by the Ministry of Finance on financial safety ratios and remedies applicable to securities companies that fail to meet the stipulated financial safety ratios and Circular No. 165/2012/TT-BTC dated 9 October 2012 amending and supplementing a number of articles of Circular No. 226/2010/TT-BTC and Note 2.1 in the financial safety ratio report (liquid capital ratio report), and for such internal control as management determines is necessary to enable the preparation and presentation of this financial safety ratio report that is free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express a conclusion on the financial safety ratio report (liquid capital ratio report) based on our review. We conducted our review in accordance with Vietnamese Standard on Review Engagements No. 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity.

A review of financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Vietnamese Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying financial safety ratio report (liquid capital ratio report) as at 30 June 2016, in all material respects, was not prepared and presented in accordance with the requirements of Circular No. 226/2010/TT-BTC dated 31 December 2010 issued by the Ministry of Finance on financial safety ratios and remedies applicable to securities companies that fail to meet the stipulated financial safety ratios and Circular No. 165/2012/TT-BTC dated 9 October 2012 amending and supplementing a number of articles of Circular No. 226/2010/TT-BTC and Note 2.1 in the financial safety ratio report (liquid capital ratio report).

NOTES TO THE FINANCIAL SAFETY RATIO REPORT (LIQUID CAPITAL RATIO REPORT) as at 30 June 2016

1. THE COMPANY

Maybank Kim Eng Securities Limited ("the Company") is a one-member limited liability company incorporated under the Law on Enterprise of Vietnam pursuant to the License No. 117/GP-UBCK dated 3 January 2014 which supersedes License No. 71/UBCK-GP granted by the State Securities Commission ("SSC") on 14 December 2007.

On 15 January 2015, the SSC issued License Amendment No. 05/GPDC-UBCK which approves the increase in the Company's charter capital to VND829,110 million.

The principal activities of the Company are to provide brokerage services, securities trading, underwriting for share issues, custodian services, investment advisory services and margin trading services.

The Company's head office is located at Floor 4A-15+16, Vincom Center Dong Khoi, 72 Le Thanh Ton Street, Ben Nghe Ward, District 1, Ho Chi Minh City, and its branches are located in Ho Chi Minh City, Hanoi and other provinces.

Number of the Company's employees as at 30 June 2016 was 196 persons (31 December 2015: 210).

2. BASIS OF PREPARATION

2.1 The applicable regulations and definitions

The financial safety ratio report (liquid capital ratio report) of the Company is prepared and presented in accordance with Circular No. 226/2010/TT-BTC dated 31 December 2010 issued by the Ministry of Finance on financial safety ratios and remedies applicable to securities companies that fail to meet the stipulated financial safety ratios and Circular No. 165/2012/TT-BTC dated 9 October 2012 amending and supplementing Circular No. 226/2010/TT-BTC.

The financial safety ratio report (liquid capital ratio report) is prepared based on the financial data of the Company at the reporting date.

The interpretations are applied for certain cases which do not have specific guidance in Circular No. 226/2010/TT-BTC and Circular No. 165/2012/TT-BTC amending and supplementing Circular No. 226/2010/TT-BTC.

In the preparation and presentation of this report, the Company has applied the following interpretations for certain cases which do not have specific guidance in Circular No. 226/2010/TT-BTC and Circular No. 165/2012/TT-BTC based on its understanding and assessment:

Item	Interpretation of the Company
The item "Retained earnings and undistributed profit after tax before making statutory reserves" (Item g, Clause 1, Article 4 - Liquid capital, Circular No. 226/2010/TT-BTC)	 This indicator is determined by the sum of: Retained earnings; Undistributed profit after tax as at 30 June 2016; and Closing balance of provisions as at 30 June 2016.

2.2 Accounting currency

The Company maintains its accounting records in Vietnam Dong ("VND").

NOTES TO THE FINANCIAL SAFETY RATIO REPORT (LIQUID CAPITAL RATIO REPORT) (continued) as at 30 June 2016

3. SIGNIFICANT POLICIES IN PREPARATION OF FINANCIAL SAFETY RATIO REPORT (LIQUID CAPTIAL RATIO REPORT)

3.1 Liquid capital ratio

Liquid capital ratio is a measure of financial safety of the Company which reflects the Company's ability to quickly settle the financial obligations and its ability to absorb the risks arising in the course of business operations.

Liquid capital ratio of the Company is determined using the formula specified in Circular No. 226/2010/TT-BTC as follows:

Liquid capital ratio = $\frac{\text{Liquid capital x 100\%}}{\text{Total exposures to risks}}$

In particular, total exposures to risks are the sum of exposures to market risk, settlement risk and operational risk.

3.2 Liquid capital

As stipulated in Circular No. 226/2010/TT-BTC, liquid capital is the equity available to meet obligations due within ninety (90) days, including:

- Paid-in capital, excluding redeemable preference shares (if any);
- Share premium;
- Supplementary capital reserve;
- Investment and development fund;
- Financial reserve;
- Other reserves belonging to owner's equity;
- Retained earnings and undistributed profit after tax before making legal reserves;
- Fifty percent (50%) of the increased value of fixed assets revaluation in accordance with regulatory requirements (in case the value of these assets is increased), or subtraction of the whole reduced value (in case the value of these assets is reduced):
- Differences in foreign exchange;
- Minority interests.

The Company's liquid capital is adjusted (i.e. increased/decreased) for the following items:

3.2.1 Increases to liquid capital

- ► Convertible debts of the Company with original maturity of five (5) years;
- Debts with original maturity of more than ten (10) years which have been registered to increase the liquid capital with the State Securities Commission; and
- Total surplus value of investments, excluding securities issued by related parties of the Company as well as securities restricted to transfer with the remaining restriction period of more than ninety (90) days from the date of this report.

NOTES TO THE FINANCIAL SAFETY RATIO REPORT (LIQUID CAPITAL RATIO REPORT) (continued) as at 30 June 2016

3. SIGNIFICANT POLICIES IN PREPARATION OF FINANCIAL SAFETY RATIO REPORT (LIQUID CAPITAL RATIO REPORT) (continued)

3.2 Liquid capital (continued)

3.2.1 Increases to liquid capital (continued)

The maximum value of items used to supplement liquid capital is 50% of the Company's owner's equity. Regarding convertible debts and debts registered to supplement the Company's liquid capital with the State Securities Commission, the Company deducts 20% of original value each year during the last five (5) years prior to maturity/conversion into common shares and deducts 25% of residual value quarterly during the last four (4) quarters prior to maturity/conversion into common shares.

3.2.2 Decreases to liquid capital

- Redeemable preferred shares and treasury shares (if any);
- ► Total decreased value of investments, excluding securities issued by the related parties of the Company as well as securities with the remaining restriction period of more than ninety (90) days from the reporting date;
- ▶ Long-term assets and short-term assets with the remaining recovery period or settlement period of more than ninety (90) days; and
- The qualification items on the audited financial statements (if any).

When determining the deductions from the liquid capital, the Company reduces the deduction value by an amount equal to the minimum value of the market value of the assets, book value, and residual value of the obligations (for assets used as collaterals for the obligations of the Company or third parties) and the minimum value of the market value of secured assets and the book value (for assets secured by the clients' assets).

3.3 Exposures to market risk

Exposures to market risk are the potential losses which may occur when market value of the Company's assets fluctuates in a negative trend and are determined by the Company using the following formula:

Exposures to market risk = Net position x Asset value x Market risk coefficient

In particular, net position is the quantity of securities held by the Company at the reporting date, after adjustments to decrease the number of securities for lending and increase the number of securities for borrowing in accordance with regulations.

Assets which are not used in determining exposures to market risk include:

- Treasury stocks;
- Securities issued by related parties of the Company in the following cases:
 - The parent company, subsidiaries, joint ventures, associates of the Company;
 - Subsidiaries, joint ventures, associates of the Company's parent company;
- Securities with the remaining restricted period of more than 90 days from the calculation date; and
- Matured bonds, debt instrument, and valuable papers of the monetary market.

NOTES TO THE FINANCIAL SAFETY RATIO REPORT (LIQUID CAPITAL RATIO REPORT) (continued) as at 30 June 2016

3. SIGNIFICANT POLICIES IN PREPARATION OF FINANCIAL SAFETY RATIO REPORT (LIQUID CAPITAL RATIO REPORT) (continued)

3.3 Exposures to market risk (continued)

3.3.1 Market risk coefficient

Market risk coefficient is determined for each item of assets as specified in Circular No. 226/2010/TT-BTC.

3.3.2 Asset value

a. Cash and cash equivalents, monetary market instruments

Value of cash in VND is the cash balance at the calculation date.

Value of cash in foreign currencies is the equivalent value in VND using the exchange rate published by credit institutions which are allowed to conduct foreign currencies trading at the calculation date.

Value of term deposits and monetary market instruments is the deposit/purchase value plus accrued interest as at the calculation date.

b. Bonds

The value of listed bonds is the average price quoted on the trading system of Securities Stock Exchange on the latest trade date plus accrued interest. In case bonds are not traded in more than two weeks prior to the date of calculation, the value of bonds is the highest value of the following: purchase price; par value; internal valuation price, including accrued interest.

The value of unlisted bonds is the highest value of the following: quoted price on the quotation system selected by the Company (if any); purchase price plus accrued interest; internal valuation price, including accrued interest.

c. Shares

The market prices of listed shares are determined based on closing prices on the stock markets as at 30 June 2016

The market prices of unlisted shares which are registered on the unlisted public companies market (UPCoM) are the closing prices as at 30 June 2016.

In case there is no transaction of shares during more than two (2) weeks prior to the date of calculation or shares are suspended, delisted or cancelled, value of these shares is the highest value of the following: book value; acquisition cost and internal valuation price.

Value of shares which are registered or custodied but not listed or registered for trading is the average price of quotations from at least three (3) securities companies which are not related to the Company on the latest trading day prior to the date of calculation. If there are no sufficient quotations from at least three (3) securities companies, the value of shares is the highest value of the following: quoted price; value determined in the latest reporting period; book value; acquisition cost; internal valuation price.

NOTES TO THE FINANCIAL SAFETY RATIO REPORT (LIQUID CAPITAL RATIO REPORT) (continued) as at 30 June 2016

3. SIGNIFICANT POLICIES IN PREPARATION OF FINANCIAL SAFETY RATIO REPORT (LIQUID CAPITAL RATIO REPORT) (continued)

3.3 Exposures to market risk (continued)

3.3.2 Asset value (continued)

d. Funds/shares of securities investment companies

Value of public close-end fund is the closing price of the latest trading day prior to the date of calculation. In case public close-end fund units are not traded during more than two weeks prior to the date of calculation, the value is calculated by net asset value ("NAV") per fund certificate in the latest reporting period prior to the calculation date.

Value of member/open-end fund/shares of securities investment companies in private placement is the NAV per unit of contributed capital/fund certificate unit/shares in the latest reporting period prior to the date of calculation.

3.3.3 Adjustment to increase exposures to market risk

Except for the securities under firm commitment during the underwriting period, Government bonds and bonds guaranteed by the Government, exposures to market risk of an asset will be adjusted to increase if the Company makes significant investments in such asset. The exposures to market risk will be adjusted in accordance with following principles:

- An increase of 10% if the value of this investment accounts for 10% to 15% of the owner's equity of the Company;
- An increase of 20% if the value of this investment accounts for 15% to 25% of the owner's equity of the Company;
- An increase of 30% if the value of this investment accounts for more than 25% of the owner's equity of the Company.

Dividends, coupons, preference right of shares (if any) or interest of deposits, cash equivalents, negotiable instruments and valuable papers shall be added to the value of asset for the purpose of determining the exposures to market risk.

3.4 Exposures to settlement risk

Exposures to settlement risk are the potential losses which may occur when a counterparty fails to settle payments punctually or transfer assets on time as committed. Exposures to settlement risk are determined at the transaction date as follows:

For term deposit contracts with credit institutions; loans to organizations and individuals; securities borrowing contracts in accordance with legal regulations; repurchase agreements and reverse repurchase agreements in accordance with legal regulations; margin loans in accordance with legal regulations; receivables, other receivables and other assets exposed to settlement risk, exposures to settlement risk before receiving securities transfer, cash and contract liquidation, should be determined according to the following formula:

Exposures = Settlement risk coefficient of counterparty x Value of asset exposed to settlement risk;

NOTES TO THE FINANCIAL SAFETY RATIO REPORT (LIQUID CAPITAL RATIO REPORT) (continued) as at 30 June 2016

3. SIGNIFICANT POLICIES IN PREPARATION OF FINANCIAL SAFETY RATIO REPORT (LIQUID CAPITAL RATIO REPORT) (continued)

3.4 Exposures to settlement risk (continued)

- For issue underwriting contracts signed with other organizations which the Company is the main underwriter, exposures to settlement risk is equal to 30% of remaining value of the underwriting contracts which has not been paid;
- For overdue receivables, other overdue receivables and other overdue assets, securities which have not yet been received on time, including securities and cash which have not yet received from term deposit contracts with the credit institutions; loans to organizations and individuals; securities borrowing contracts in accordance with legal regulations; repurchase and reverse repurchase agreements in accordance with legal regulations; matured margin loans, in accordance with legal regulations, exposures to settlement risk is determined as follow:

Exposures to settlement risk = Settlement risk coefficient by time x Value of asset exposed to settlement risk.

3.4.1 Settlement risk coefficient

Settlement risk coefficient is determined based on the type of counterparties and the overdue period as stipulated in Circular No. 226/2010/TT-BTC.

Settlement/transfer period of securities is T+2 (for listed securities), T+1 (for listed bonds); or T+n (for transactions outside the trading system within n days under agreement of both parties).

NOTES TO THE FINANCIAL SAFETY RATIO REPORT (LIQUID CAPITAL RATIO REPORT) (continued) as at 30 June 2016

3. SIGNIFICANT POLICIES IN PREPARATION OF FINANCIAL SAFETY RATIO REPORT (LIQUID CAPITAL RATIO REPORT) (continued)

- 3.4 Exposures to settlement risk (continued)
- 3.4.2 Value of assets exposed to settlement risk
 - a. Purchase or sale of securities for customers or the Company

Value of assets exposed to settlement risk is the market value of the contract determined as follow:

Value of assets exposed to settlement risk in securities borrowing and lending, margin trading, repurchase transactions, loans for margin trading, repurchase or reverse repurchase agreements:

No.	Transaction type	Value of assets exposed to settlement risk
1.	Term deposits and loans without collaterals, and receivables from the securities trading and securities services	Total loan value
2.	Securities lending	Max{(Market value of the contract –Collateral value (if any)),0}
3.	Securities borrowing	Max{(Collateral value – Market value of the contract),0}
4.	Reverse repurchase agreements	Max{(Contract value based on purchase price – Market value of the contract x (1 - Market risk coefficient)),0}
5.	Repurchase agreements	Max{(Market value of the contract x (1 — Market risk coefficient) - Contract value based on selling price),0}
6.	Margin contracts (loans to customers to purchase securities)/other economic agreements with similar nature	Max{(Margin balance - Collateral value),0}

Debt balance includes outstanding loan principal, interest and other fees.

Collateral value = Quantity of assets x Value of assets x (1 – Market risk coefficient).

Market risk coefficient is determined for each item of assets as specified in Circular No. 226/2010/TT-BTC.

Value of assets is determined under section 3.3.2.

NOTES TO THE FINANCIAL SAFETY RATIO REPORT (LIQUID CAPITAL RATIO REPORT) (continued) as at 30 June 2016

3. SIGNIFICANT POLICIES IN PREPARATION OF FINANCIAL SAFETY RATIO REPORT (LIQUID CAPITAL RATIO REPORT) (continued)

- 3.4 Exposures to settlement risk (continued)
- 3.4.2 Value of assets exposed to settlement risk (continued)
 - a. Purchase or sale of securities for customers or the Company (continued)
 - Value of assets exposed to settlement risk in securities trading

No.	Period	Value of assets exposed to settlement risk	
 A – For the selling transactions (seller is the Company or its customers under t securities brokerage activities) 			
1.	Before receiving payment	0	
2.	After receiving payment	Market value of the contract (if market value is less than trading value)	
		0 (if market value is greater than trading value)	
B – For the buying transactions (buyer is the Company or the Company's customer)			
1.	Before receiving securities	0	
2.	After receiving securities	Market value of the contract (if market value is greater than trading value)	
		0 (if market value is less than trading value)	

b. Receivables, matured bonds, matured debt instruments

Value of assets exposed to settlement risk is the value of receivables calculated based on par value, plus accrued interest, related costs and less cash received previously (if any).

3.4.3 Deduction of value of assets exposed to settlement risk

The Company should deduct the value of collaterals of counterparties and customers in determining value of assets exposed to settlement risk if the contracts and transactions fulfill the following conditions:

- ► Counterparties and customers have collaterals to ensure their performance of obligations and their collaterals are cash, cash equivalents, valuable papers, negotiable instruments on the monetary market, securities listed and registered on the Securities Stock Exchange, Government bonds, bonds issued and guaranteed by the Ministry of Finance:
- ► The Company has rights to control, manage, use, and transfer collaterals if counterparties fail to make payment obligations fully and timely as agreed in the contracts.

Value of asset subjected to deduction is determined as follows:

Collateral value = Quantity of assets x Value of assets x (1 – Market risk coefficient)

NOTES TO THE FINANCIAL SAFETY RATIO REPORT (LIQUID CAPITAL RATIO REPORT) (continued) as at 30 June 2016

3. SIGNIFICANT POLICIES IN PREPARATION OF FINANCIAL SAFETY RATIO REPORT (LIQUID CAPITAL RATIO REPORT) (continued)

3.4 Exposures to settlement risk (continued)

3.4.4 Increase in exposures to settlement risk

Exposures to settlement risk are adjusted to increase in the following cases:

- An increase of 10% if the value of loans to an organization, an individual and a group of related organizations/individuals (if any) accounts for from 10% to 15% of the owner's equity of the Company;
- An increase of 20% if the value of loan to an organization, an individual and a group of related organizations/individuals (if any) accounts for from 15% to 25% of the owner's equity of the Company;
- An increase of 30% if the value of loan to an organization, an individual and a group of related organizations/individuals (if any), or an individual and related parties of that individual (if any), accounts for more than 25% of the owner's equity of the Company.

3.4.5 Netting off of value of assets exposed to settlement risk

The value of assets exposed to settlement risk is subjected to netting off in case of:

- Settlement risk is attributable to the same counterparties;
- Settlement risk arises in the same type of transactions; or
- ▶ The net-off has been agreed in written documents by both parties.

Settlement/transfer period of securities is T+2 (for listed securities), T+1 (for listed bonds); or T+n (for transactions outside the trading system within n days under agreement of both parties).

3.5 Exposures to operational risk

Exposures to operational risk are the potential losses which may occur due to technical errors, system errors and business processes, human errors during operation, or due to the lack of capital resulting from expenses, losses arising from investment activities, or other objective causes.

Exposures to operational risk of the Company is the higher of 25% of the Company's operating costs for operational continuity within twelve (12) consecutive months from last month and 20% of the Company's legal capital.

The Company's costs for operational continuity are total costs incurred in the period minus: depreciation expenses; provisions for impairment of short-term and long-term investments; and provisions for doubtful debts.
